St. Anthony Community Hospital
A Member of the Westchester Medical Center Health Network

Community Health Needs Assessment 2019-2021

EXECUTIVE SUMMARY

Every three years, the New York State Department of Health requires Local Health Departments to submit Community Health Improvement Plans (CHIP) and hospitals to submit Community Service Plans (CSP) which require a thorough Community Health Assessment (CHA) to be completed. In addition, the IRS requires all non-profit hospitals to conduct a Community Health Needs Assessment (CHNA) every three years and to adopt an implementation strategy to meet the identified community health needs. These assessments and subsequent action plans are meant to meet several requirements outlined by both New York State public health law and the Affordable Care Act.

In recent years, the New York State Department of Health has encouraged local hospitals and health departments to collaborate in the creation of joint CHIP/ CSP documents in order to better serve their communities. To that end, beginning in 2017, the seven Local Health Departments of the Mid-Hudson Region, including Dutchess, Orange, Putnam, Rockland, Sullivan, Ulster, and Westchester Counties, along with HealtheConnections (the Regional Health Information Organization covering the Hudson Valley of New York) created the Local Health Department Prevention Agenda Collaborative with the goal of creating the first regional Community Health Assessment for the Mid-Hudson Region.

St. Anthony Community Hospital contributed both funding and staff members to join the Collaborative in contract with Siena College Research Institute (SCRI). SCRI conducted a random digit dial regional community health survey to supplement the Regional Community Health Assessment. In order to gauge the perception of residents surrounding health and resources in their communities, responses from 5,372 residents of the Mid-Hudson Region were collected. To further supplement the data collected, members of the Collaborative held 12 focus groups with service providers to understand the needs of specific communities and populations, and the barriers they face to achieving optimal health.

As guidance for the St. Anthony Community Hospital Community Health Needs Assessment, all data gathered through the collaborative CHA process served as the required research and public input to identify public health needs and develop action plans necessary to address the specific needs of the communities we serve.

In this report we have identified both internal and community-wide resources that will work together to address the identified health needs of our community. The implementation plan included in this document outlines evidence-based interventions, resources, partners, and intended outcomes.

If you would like additional information on this CHNA, please email Barbara_Demundo@bshsi.org or call St. Anthony Community Hospital at 845-986-2276.
FACILITY DESCRIPTION AND VISION

St. Anthony Community Hospital:

St. Anthony Community Hospital, Warwick, New York, a Member of the Westchester Medical Center Health Network, is a non-profit, 60-bed hospital serving the residents of Orange County, NY, Sussex and Passaic Counties in NJ. St. Anthony Community Hospital has been a primary resource for emergency, quality medical and wellness care since 1939.

Among the services provided are comprehensive women's health programs, which includes the Kennedy Birthing Center and the Women’s Imaging Center. The Center for Ambulatory Services offers the clinical and support services needed - all in one location. These include admitting, pre-admission screening, endoscopy, minor surgery and same-day surgery.

Patients seeking comfortable and convenient infusion therapy can utilize the Outpatient Infusion Center within the hospital. Our quiet and relaxing facility includes long term intravenous antibiotics, blood transfusions, iron therapy, chemotherapy, and long term catheter insertion and maintenance. For members of our community, we have a dedicated Diabetes Education program committed to improving the lives of children and adults living with diabetes through support programs which educate, inspire and empower.

As a member of the Bon Secours Charity Health System, the Mission of St. Anthony Community Hospital is to make visible God’s love and to be Good Help to Those in Need, especially those who are poor, vulnerable and dying. As a system of caregivers, we commit ourselves to help bring people and communities to health and wholeness as part of the healing ministry of Jesus Christ and the Catholic Church.

As a prophetic Catholic Health ministry, we will partner with our communities to create a more humane world, build health equity and social justice for all, and provide exceptional value for those we serve. We will continue to strive to be the leading provider of quality, compassionate and regional community health care services in the Hudson Valley.

Westchester Medical Center Health Network:

The Westchester Medical Center Health Network (WMCH) is a 1,700-bed healthcare system headquartered in Valhalla, New York, with 10 hospitals on eight campuses spanning 6,200 square miles of the Hudson Valley. WMCH employs more than 12,000 people and has nearly 3,000 attending physicians. From Level 1, Level 2 and Pediatric Trauma Centers, the region’s only acute care children’s hospital, an academic medical center, several community hospitals, dozens of specialized institutes and centers, skilled nursing, assisted living facilities, homecare services and one of the largest mental health systems in New York State, today WMCH is the pre-eminent provider of integrated healthcare in the Hudson Valley.
FACILITY SERVICE AREA AND DESCRIPTION OF COMMUNITY

St. Anthony Community Hospital is located within the Village of Warwick, NY in the south-western portion of Orange County. Orange County begins approximately 40 miles north of New York City, and is positioned between the Hudson River in the east and the Delaware River in the west, the only county in New York State to border both rivers. Ulster and Sullivan Counties border Orange County on the north, and Rockland County is located to the south. Orange County is 839 square miles and is a diverse mix of rural, farmland, suburban, and urban areas.

Orange County continues to experience steady population growth, with the 2010 Census indicating that Orange County grew 9.2% from 2000 to 2010 to now include 372,813 residents. The population of the Village of Warwick is 6731.

Based on 2010 U.S. Census population estimates, the median age in Orange County has increased by more than 2 years since 2007, to 36.6 years; the largest cohort of residents is between the ages of 45 and 49. The number of residents ages 65-69 is forecasted to more than double from 2000-2020 primarily due to the entry of ‘baby boomers’ into these age ranges.

According to the U.S. Census, 11.1% of residents in Orange County were foreign born, with 22.3% of persons over the age of five speaking a language other than English at home.

Poverty rates in Orange County vary greatly based on municipality. Poverty rates exceeding 25% for families with related children under 18 are found in Orange County’s three cities (Middletown, Newburgh, and Port Jervis), as well as in the town of Monroe.

Bon Secours Charity Health System, of which St. Anthony Community Hospital is a part, has defined a service area by zip codes within Orange, Rockland and Sullivan Counties based on the volume of inpatients receiving care at our acute care facilities.

Source: U.S. Census Bureau, 2017 American Community Survey 5-year estimates
In New York State, nearly one in four adults, over 3.3 million people, have a disability. Adults with a disability typically have a higher rate of chronic conditions, such as obesity, heart disease, and diabetes. Structural and societal barriers can limit the ability to participate in work, recreation, and programs aimed at promoting healthy living for those living with a disability.

Various types of disabilities can affect an individual’s quality of life. Types of disability include:

- Independent living disability – difficulty performing tasks or errands alone, such as visiting a doctor’s office or shopping due to a physical, mental, or emotional condition
- Cognitive disability – serious difficulty concentrating, remembering, or making decisions due to a physical, mental, or emotional condition
- Self-care disability – difficulty handling tasks, such as dressing or bathing on one’s own
- Mobility disability – difficulty moving around physically, such as walking or climbing stairs
- Hearing disability – deafness or serious difficulty hearing
- Vision disability – blindness or serious difficulty seeing (even when wearing glasses)

In the Mid-Hudson Region, Rockland County had the lowest percentage of adults living with a disability and Orange County had the highest percentage of adults living with a self-care disability.
CHNA METHODOLOGY AND COMMUNITY INPUT

Beginning in 2017, St. Anthony Community Hospital entered into a collaborative 7-County partnership to create a regional Community Health Assessment (CHA) which was directed by Orange County Epidemiologist Jackie Lawler and representatives from HealtheConnections. This collaborative developed the Regional Community Health Assessment Survey (Appendix A) for the purposes of creating the CHA and to inform future health improvement efforts in the Mid-Hudson Region. This survey was designed to include questions to collect information around several initiatives and priorities put forward by the New York State Department of Health and the NYS Prevention Agenda 2019-2024.

Survey data collection, analysis, and charting were provided by a team from Siena College Research Institute. SCRI administered a random digit dial survey by phone which took place between April and September of 2018, utilizing both landline and mobile phone numbers to reach respondents. Results were then weighted by gender, age, race, and region according to the U.S. Census 2010.

The Regional Community Health Assessment Survey collected responses from a randomized sample of over 5,000 Hudson Valley residents however, there were some populations that may not have been fully accounted for in the survey. Some of these underrepresented populations include those who are low-income, veterans, seniors, people experiencing homelessness, LGBTQ members, and people with a mental health diagnosis. In order to ensure that the needs of these populations were met, focus groups were conducted with providers that serve these populations by offering mental health support, vocational programs, nutritional and educational programs, and family and community support. Before these focus groups took place, a Stakeholder Interview Form (Appendix B) was sent out to these providers in order to supply additional insight around local factors influencing community health. This survey covered several topics, including the populations the providers serve; the issues that affect health in the communities they serve; barriers to people achieving better health; and interventions that are used to address social determinants of health. Throughout the seven counties in the Mid-Hudson Region, 285 surveys were completed by service providers. The answers to the survey varied throughout each county, and these differences were expanded upon in the focus groups.

The data from the CHA, Stakeholder Interview forms, and focus groups, along with BRFSS data, was presented at an Orange County Community Health Priority Selection Summit in June of 2019, where more than 100 local health/human services providers and CBOs assisted in the selection of each county’s CHIP/CSP Focus Areas. At this Summit, 2 Priority Areas for the county were chosen within the framework of the 2019-2024 NYS Prevention Agenda.

For the purposes of aligning the county’s collective resources to move towards achieving the NYS Prevention Agenda’s goals, the chosen Priority Areas for Orange County are:

- Prevent Chronic Disease
- Prevent Communicable Disease

The Orange County Health Summary is presented in Appendix C.
IDENTIFIED COMMUNITY HEALTH NEEDS

To provide guidance for the St. Anthony Community Hospital CHNA, a Bon Secours Charity Health System Community Needs Steering Committee was formed to direct the CHNA process. This committee is responsible for prioritizing community needs and developing hospital-specific implementation plans to address the identified health needs. Committee members are also responsible for reporting outcomes on a yearly basis for the IRS 990 Schedule H.

Bon Secours Charity Health System Community Needs Steering Committee Members
Chief Executive Officer: Dr. Mary Leahy
Committee Co-chairs: Barbara Demundo and Jason Rashford
Executive Management Team Members: Sister Susan Evelyn, Patrick Schmincke
Finance Representative: David Albright
Population Health Representatives: Craig Dickman, Sapna Shah
Good Samaritan Hospital members: Dr. Adrienne Wasserman, Sheila Magee, Claudia Williams
Bon Secours Community Hospital members: Sophie Crawford, Mary Decker, Karen Murphy, Tobie Westward Milone
St. Anthony Community Hospital members: Anita Volpe, Dr. Mark Madis

The St. Anthony Community Hospital 2019 – 2021 CHNA Implementation Plan was developed by using evidence based interventions as recommended by the NYS Prevention Agenda 2019 – 2024. The overarching strategy of the NYS Prevention Agenda is to implement public health approaches that improve the health and well-being of entire populations and achieve health equity. This strategy includes an emphasis on social determinants of health, defined by Healthy People 2020 as the conditions in the environments in which people are born, live, learn, work, play, worship, and age that affect a wide range of health, functioning, and quality-of-life outcomes and risks. The Prevention Agenda also forms the important framework through which community health needs are prioritized.

- The Prevention Agenda’s five Priority Areas serve as the blueprint for state and local action to improve the health of New Yorkers. As per the NYSDOH requirements, St. Anthony Community Hospital must choose a minimum of two health goals to address from among the following five priority areas:
  - Prevent Chronic Diseases
  - Promote a Healthy and Safe Environment
  - Promote Healthy Women, Infants and Children
  - Promote Well-Being and Prevent Mental and Substance Use Disorders
  - Prevent Communicable Diseases

In partnership with the Orange County Health Department, Orange County hospitals, and health and human service agencies, St. Anthony Community Hospital has chosen the following Prevention Agenda goals to work towards over the next three years
- Increase cancer screening rates for breast, cervical, and colorectal cancers
- Increase food security
- Reduce the annual rate of growth for Sexually Transmitted Infections
COMMUNITY RESOURCES

Orange County, NY is resource-rich with an extensive network of health and human service agencies located throughout the county. In addition to these agencies, Orange County is home to five area hospitals, hundreds of medical providers, two-year and four-year colleges, a medical school and several large Federally Qualified Health Centers. Throughout the CHA process, these community partners assisted the Health Department to assess and prioritize health needs and many have made commitments to work towards the health goals of the county.

St. Anthony Community Hospital has chosen specific Prevention Agenda goals based on our internal expertise, resources, and the desire and commitment to improve the health and well-being of our community members. As no one entity can address all needs, community partners are essential to help achieve the Prevention Agenda goals. As a member of the Joint Membership of Health and Community Agencies (JMHCA), Bon Secours Community Hospital works collectively with the member agencies to address the diverse needs within the county that the hospital could not do alone.

The following JMHCA member agencies are uniquely positioned to serve as community resources to meet both specific and diverse community needs:

- Access: Supports for Living
- Action Toward Independence
- Alcoholism & Drug Abuse Council of Orange County
- The ARC of Orange County, NYSARC, Inc.
- Catholic Charities of Orange and Sullivan
- Cornerstone Family Healthcare
- CPI/Epilepsy Society of Southern New York
- CRVI
- Dispute Resolution Center
- Ezras Cholim Health Center
- Farmworkers Community Corp.
- Highland Rehabilitation and Nursing Center
- HONOREhg, Inc.
- Independent Living, Inc.
- Inspire
- Jewish Family Service of Orange County
- Legal Services of the Hudson Valley
- Maternal-Infant Services Network of Orange/Sullivan/Ulster
- Mental Health Association of Orange County, Inc.
- Middletown Community Health Center
- NAMI Orange
- Orange County Department of Mental Health
- Orange County Housing Consortium
- People, Inc.
- RECAP, Inc.
- Rehabilitation Support Services, Inc.
- Restorative Management Corp.
- Safe Harbors of the Hudson, Inc.
- Safe Homes of Orange County
- United Way of the Dutchess-Orange Region
- Youth Advocate Program
EVALUATION OF IMPACT FROM PREVIOUS CHNA

St. Anthony Community Hospital’s 2016 – 2018 CHNA had the following impact:

Goal:
Adequately invest in proven community-based programs that result in increased levels of physical activity

Impact:
- Complete Streets policy in effect within the Village of Warwick.
- Worked with Village of Warwick Mayor and Orange County Planning Dept. to map out a municipal walking path.
- Warwick Walks! Walking Path was opened in May 2018

Goal:
Increase the proportion of New York State babies who are breastfed.

Impact:
- SACH provides free parenting classes that taught expectant parents the benefits of breastfeeding their newborn.
- SACH also offered a free breastfeeding support group for the community.
- Upon discharge, each mother is given a listing of available community support/services, courtesy of the Family Central Parenting Support Services group. SACH offers free parenting classes that focus on preparation for breastfeeding your newborn.
- Lactation consultant is available to see new mothers after discharge to help with breastfeeding issues.
### NYS PREVENTION AGENDA PRIORITY AREA: PREVENT CHRONIC DISEASES

**FOCUS AREA 1:** Healthy Eating and Food Security

**PREVENTION AGENDA GOAL 1.3:** Increase food security

**OBJECTIVE:** By December 31, 2021, increase the percentage of adults with perceived food security by 5% from 75.6% to 79.4%. (Date Source: BRFSS, 2016)

**EVIDENCE BASED INTERVENTIONS 1.3.6:** Screen for food insecurity, facilitate, and actively support referrals (Sources: Feeding America; AARP)

**DISPARITY ADDRESSED:** People with low SES and low food security

## NYS PREVENTION AGENDA PRIORITY AREA: PREVENT CHRONIC DISEASES

### FOCUS AREA 4: Preventive Care and Management

**PREVENTION AGENDA GOAL 4.1:** Increase cancer screening rates for breast, cervical, and colorectal cancers, especially among disparate populations in the cities of Newburgh, Middletown and Port Jervis

**OBJECTIVE:** By 12/31/2021, increase % of adults receiving breast cancer, cervical, and colorectal cancer screenings based on the most recent screening guidelines by 5%. (Baselines: 75.9% Breast Cancer Screening; 76.1% Cervical Cancer Screening and 68.5% Colorectal Cancer Screening; Data Source: BRFSS, 2016)

**EVIDENCE BASED INTERVENTIONS:**

**4.1.2:** Conduct one-on-one (by phone or in person) and group education (presentation or other interactive session) in a church, home, senior center of other setting (Source: The Community Guide)

**4.1.3:** Use small media and health communications to build public awareness and demand (Source: The Community Guide)

**DISPARITIES ADDRESSED:** Low SES concentrated in areas with high racial/ethnic minorities; Education level

### NYS PREVENTION AGENDA PRIORITY AREA: PREVENT COMMUNICABLE DISEASES

**FOCUS AREA 3:** Sexually Transmitted Infections (STIs)

**PREVENTION AGENDA GOAL 3.1:** Reduce the annual rate of growth for STIs

**OBJECTIVE #1:** By December 31, 2021, reduce the annual rate of growth of chlamydia by 50% from 2.17% to 1.09%. (Baseline Data: 2016-2018 average 3-year percent change)

**OBJECTIVE #2:** By December 31, 2021, reduce the annual growth rate for gonorrhea by 50% from 4.0 to 2.0% (Baseline Data: 2016-2018 average 3-year percent change)

**OBJECTIVE #3:** By December 31, 2021, reduce the annual growth rate for early syphilis by 50% from 20% to 10% (Baseline Data: 2016-2018 average 3-year percent change)

(Data source: NYSDOH Communicable Disease Electronic Surveillance System (CDESS), 2016-2018)

**EVIDENCE BASED INTERVENTION 3.1.2:** Increase STI testing and treatment (Source: CDC)

**DISPARITY ADDRESSED:** People with low education level and/or low SES

Hello, this is _____ for the Siena College Research Institute. We are working with local health departments and hospital systems to survey Hudson Valley residents to better understand the health status and health-related values of people who live in the community.

IF NEEDED:
You've been selected at random to be included in this survey. Your individual responses are confidential and no identifiable information about you will be shared with anyone—all responses are grouped together. The questions I am going to ask you to relate to your health and to your thoughts about health-related resources in your community. Again, your responses may really help to strengthen health policies and services.

IF NEEDED:
In total, the survey takes approximately ____ minutes to complete and you may refuse to answer any question that you do not want to answer. Are you able to help us with this important project? (NOW IS ALSO A TIME TO OFFER A CALL BACK AT A SPECIFIC, REQUESTED TIME AND PHONE NUMBER)

1. Overall, would you say that the quality of life in your community is excellent, good, fair or poor?
   A. Excellent
   B. Good
   C. Fair
   D. Poor

2. What State do you live in? [If not NY or CT, terminate]

3. What County do you live in? [If not Dutchess, Orange, Rockland, Putnam, Sullivan, Ulster Westchester or Litchfield CT (?), terminate]

4. What is your zip code? _____________

5. How long have you lived in _______ County?
   A. Less than 1 year
   B. 1-5 years
   C. More than 5 years

6. I’m going to read you a series of statements that some people make about the area around where they live, that is, their community. For each, tell me if that statement is completely true of your community, somewhat true, not very true or not at all true for your community.
   A. There are enough jobs that pay a living wage.
   B. Most people are able to access affordable food that is healthy and nutritious.
   C. People may have a hard time finding a quality place to live due to the high cost of housing.
   D. Parents struggle to find affordable, high-quality childcare.
   E. There are sufficient, quality mental health providers.
   F. Local government and/or local health departments, do a good job keeping citizens aware of potential public health threats.
   G. There are places in this community where people just don’t feel safe.
   H. People can get to where they need using public transportation.
7. How important is it to you that the community where you live have the following?
   A. Accessible and convenient public transportation
   B. Affordable public transportation
   C. Well-maintained public transportation vehicles
   D. Safe public transportation stops or waiting areas
   E. Special transportation services for people with disabilities or older adults

8. Overall, how would you rate the community you live in as a place for people to live as they age?
   A. Excellent
   B. Good
   C. Fair
   D. Poor
   E. I don’t know

9. For each of the following aspect of life, please rate it as excellent, good, fair, or poor in your community. Please let me know if you simply do not know enough to say.
   A. The availability of social/civic programs for seniors
   B. The quality of health care services for seniors
   C. The availability of programs and activities for youth outside school hours
   D. The quality of information from county agencies during public emergencies, such as weather events or disease outbreaks

10. In general, how would you rate your health? Would you say that your health is excellent, good, fair or poor?
    A. Excellent
    B. Good
    C. Fair
    D. Poor

11. Have you ever been told by a doctor or other health professional that you have any chronic health condition, such as high blood pressure, diabetes, high cholesterol, asthma or arthritis?
    A. Yes
    B. No

12. If YES to 11--How confident are you that you can manage your physical health condition?
    A. Very Confident
    B. Somewhat Confident
    C. Not Very Confident
    D. Not at all confident

13. Mental health involves emotional, psychological and social wellbeing. How would you rate your overall mental health? Would you say that your mental health is excellent, good, fair or poor?
    AS NEEDED: This includes things like hopefulness, level of anxiety and depression.
    A. Excellent
    B. Good
    C. Fair
    D. Poor

14. Have you ever experienced a mental health condition or substance or alcohol use disorder?
    A. Yes       B. No
15. If YES to 14—How confident are you that you can manage your mental health condition?
   A. Very Confident
   B. Somewhat Confident
   C. Not Very Confident
   D. Not at all confident

16. Thinking back over the past 12 months, for each of the following statements I read, tell me how many days in an
   AVERAGE WEEK you did each. Over the past 12 months how many days in an average week did you... (responses are 0
days, 1-3 days, 4-6 days or all 7 days)
   A. Ate a balanced, healthy diet
   B. Exercised for 30 minutes or more a day
   C. Got 7-9 hours of sleep in a night

17. On an average day, how stressed do you feel?
   AS NEEDED: Stress is when someone feels tense, nervous, anxious, or can’t sleep at night because their mind is troubled.
   A. Not at all stressed
   B. Not very stressed
   C. Somewhat stressed
   D. Very stressed

18. In your everyday life, how often do you feel that you have quality encounters with friends, family, and neighbors that
   make you feel that people care about you? (IF NEEDED: For example, talking to friends on the phone, visiting friends or
   family, going to church or club meetings)
   A. Less than once a week
   B. 1-2 times a week
   C. 3-5 times a week
   D. More than 5 times a week

19. Have you smoked at least 100 cigarettes in your entire life?
   A. Yes  B. No

20. If YES to 19, do you now smoke cigarettes every day, some days, or not at all?
   A. Everyday
   B. Some days
   C. Not at all

21. Pertaining to alcohol consumption, one drink is equivalent to a 12-ounce beer, a 5-ounce glass of wine, or a drink
   with one shot of liquor. During the last 30 days, on the days when you drank, about how many drinks did you drink on
   average? [If respondent gives a range, ask for one whole number. Their best estimate is fine. If they do not drink, enter
   0.]
   _______ drinks

22. [If Q21>0] Considering all types of alcoholic beverages, how many times during the past 30 days did you have X [5 for
   men, 4 for women] or more drinks on an occasion?
   A. _______ number of times
   B. None
23. How frequently in the past year have you used an illegal drug or used a prescription medication for non-medical reasons?
   A. Never
   B. Less than once per month
   C. More than once per month, but less than weekly
   D. More than once per week, but less than daily
   E. Daily

24. In the past 12 months, have you or any other member of your household been unable to get any of the following when it was really needed? Please answer yes or no for each item.
   A. Food
   B. Utilities, including heat and electric
   C. Medicine
   D. Any health care, including dental or vision
   E. Phone
   F. Transportation
   G. Housing
   H. Childcare

25. Have you visited a primary care physician for a routine physical or checkup within the last 12 months?
   A. Yes       B. No

26. If NO to question 25, in the last 12 months, were any of the following reasons that you did not visit a primary care provider for a routine physical or checkup? (SELECT ALL THAT APPLY)
   A. I did not have insurance
   B. I did not have enough money (prompt if needed: for things like co-payments, medications)
   C. I did not have transportation
   D. I did not have time
   E. I chose not to go
   F. Other_________________________________

27. Have you visited a dentist for a routine check-up or cleaning within the last 12 months?
   A. Yes       B. No

If NO to question 27, in the last 12 months, were any of the following reasons that you did not visit a dentist for a routine check-up or cleaning? (SELECT ALL THAT APPLY)
   A. I did not have insurance
   B. I did not have enough money (prompt if needed: for things like co-payments, medications)
   C. I did not have transportation
   D. I did not have time
   E. I chose not to go
   F. Other_________________________________

Sometimes people visit the emergency room for medical conditions or illnesses that are not emergencies; that is, for health-related issues that may be treatable in a doctor’s office.

28. Have you visited an emergency room for a medical issue that was not an emergency in the last 12 months?
   A. Yes       B. No
29. If YES to question 28, in the last 12 months, for which of the following reasons did you visit the emergency room for a non-health emergency rather than a doctor's office? (SELECT THE BEST OPTION)
   A. I do not have a regular doctor/primary care doctor
   B. The emergency room was more convenient because of the location
   C. The emergency room was more convenient because of the cost
   D. The emergency room was more convenient because of the hours of operation
   E. At the time I thought it was a health-related emergency, though I later learned it was NOT an emergency

If yes to 13 (behavioral health condition)
30. Have you visited a mental health provider, such as a psychiatrist, psychologist, social worker, therapist for 1-on-1 appointments or group-sessions, etc. within the last 12 months?
   A. Yes
   B. No

31. If NO to question 30, in the last 12 months, were any of the following reasons that you did not visit a mental health provider? (SELECT ALL THAT APPLY)
   A. I did not have insurance
   B. I did not have enough money (prompt if needed: for things like co-payments, medications)
   C. I did not have transportation
   D. I did not have time
   E. I chose not to go
   F. Other_________________________________

32. How likely would you be to participate in the following types of programs aimed at improving your health? Would you be very likely, somewhat likely, not very likely or not at all likely?
   A. A mobile app based program on your smart phone
   B. An in person, one-on-one program
   C. An in person, group program
   D. An online, computer based, one-on-one program
   E. An online, computer based, group program

We are just about finished. These last few questions are about you.
33. Are you Hispanic?
   A. Yes
   B. No

34. What is your race?
   A. White
   B. Black
   C. Asian
   D. Other

35. Do you have health insurance?
   A. Yes
   B. No
36 What is your source of health insurance?
   A. Employer
   B. Spouse/Partner’s employer
   C. NYS Health Insurance marketplace/Obamacare
   D. Medicaid
   E. Medicare
   F. None
   G. Other

37. What is your living arrangement? Do you...
   A. Rent an apartment or home
   B. Own your own
   C. Other living arrangement

38. What is your employment status?
   A. Employed full time
   B. Employed part-time
   C. Unemployed, looking for work
   D. Unemployed, not looking for work
   E. Retired

39. Are there children <18 living in your household?
   A. Yes
   B. No

40. Are you or anyone in your household a veteran or a member of active duty military service?
   A. Yes
   B. No

41. Do you or anyone in your household have a disability?
   A. Yes
   B. No

42. About how much is your total household income, before any taxes? Include your own income, as well as your spouse or partner, or any other income you may receive, such as through government benefit programs. (READ THE FOLLOWING OPTIONS)
   A. Less than $25,000
   B. $25,000 to $49,999
   C. $50,000 to $99,999
   D. $100,000 to $149,999
   E. $150,000 or more

43. What is your gender?
   A. Male
   B. Female
   C. Transgender/other gender
Stakeholder Interview Form

1. Name_________________________________________________
2. Organization ____________________________________________
3. Organization Website _____________________________________
4. Position________________________________________________

5. What is your service area?
   □ On website
   _________________________________________________________
   _________________________________________________________
   _________________________________________________________

6. Who do you serve? Please check all that apply
   □ Infants and toddlers
   □ Children
   □ Adolescents
   □ Adults
   □ Seniors
   □ Veterans
   □ English as a second language
   □ Women (services specifically for women)
   □ Men (services specifically for men)

   □ Those with a substance use disorder
   □ Those with a mental health diagnosis
   □ People with disabilities
   □ People experiencing homelessness
   □ Incarcerated or recently incarcerated
   □ Low income
   □ General population
   □ All the above
7. Thinking about the populations that you serve, what are the top 3 issues that affect health in the communities you serve?

- Access to affordable nutritious food
- Access to affordable, decent and safe housing
- Access to affordable, reliable transportation
- Access to affordable, reliable public transportation
- Access to culturally sensitive health care providers
- Access to affordable health insurances
- Access to clean water and non-polluted air
- Access to medical providers
- Access to mental health providers
- Access to high quality education
- Access to specialty services/providers

8. Which of the following are the top 3 barriers to people achieving better health in the communities you serve?

- Knowledge of existing resources
- Geographic location – living in an urban area
- Geographic location – living in a rural area
- Health literacy
- Having someone help them understand insurance
- Having someone to help them understand their medical condition
- Having a safe place to play and/or exercise
- Quality of education
- Attainment of education
- Drug and/or alcohol use
- Cultural Customs
- Other (specify) __________________

9. Besides lack of money, what are the underlying factors and barriers to solving the top 3 issues you identified in the communities you serve?

________________________________________________________________________________________
________________________________________________________________________________________
________________________________________________________________________________________

10. What evidence-based interventions (if any) do you use that target your populations to address the social determinants of health?

________________________________________________________________________________________
________________________________________________________________________________________
11. As we go through the following list of health issues, please rate from 1 to 5 the impact of the health issues in your service area with 1 being very little and 5 being highly impacted.

   **Chronic Disease (e.g. heart disease, diabetes, asthma, obesity, cancer, etc.)**
   (Very Little) 1   2   3   4   5 (Highly Impacted)

   **Health Disparities**
   (Very Little) 1   2   3   4   5 (Highly Impacted)

   **Mental Health and Substance Use Issues**
   (Very Little) 1   2   3   4   5 (Highly Impacted)

   **Maternal and Child Health issues**
   (Very Little) 1   2   3   4   5 (Highly Impacted)

   **Environmental Factors (e.g. built environment, air/water quality, injuries, falls, food safety)**
   (Very Little) 1   2   3   4   5 (Highly Impacted)

   **Prevent Communicable diseases (e.g. sexually transmitted infections, hepatitis C, HIV, vaccine preventable disease, hospital acquired infections, etc.)**
   (Very Little) 1   2   3   4   5 (Highly Impacted)
Orange County is located in the southeastern area of New York State, bounded on the east by the Hudson River and on the west by the Delaware River. It is located approximately 40 miles north of New York City with 40 municipalities and approximately 378,174 residents in 2017. Of Orange County residents, 50.1% are male, 68.5% are non-Hispanic White, 9.7% are non-Hispanic Black and 19.7% are Hispanic. Orange County is a mix of urban, suburban, farmland and rural areas. 24.0% of the population resides in rural areas, twice the average of New York State. Agriculture is a leading industry in Orange County and constitutes more than half of the County’s open space. The availability of multiple modes of transportation, including bus, train and major highways, allow residents to travel to New York City, New Jersey, and Southern New York State for employment. Orange County also contains New York Stewart International Airport in Newburgh, NY and West Point Military Academy in Highland Falls, NY. At first glance, Orange County appears to be an affluent suburban community that enjoys a median household income above the New York State average ($75,146 vs. $62,765, respectively); a smaller percentage of individuals living below the poverty line (12.2% vs. 15.1% respectively); a smaller unemployment rate (5.6% vs. 6.6%, respectively); and boasts a higher percentage of high school graduates as compared to New York State (89.6% and 86.1%, respectively). However, aggregate county data are misleading and masks the disparities within the County. The urban areas of Orange County are characterized by severe socioeconomic and health inequities, with one-third of the population living below the poverty line and residing in the three major cities (Newburgh, Middletown, and Port Jervis).

AREAS OF FOCUS

Heart disease and cancer are the leading causes of death and leading causes of premature death (death before age 75) by a large margin. Obesity is a leading contributor to these top causes of death, as well as diabetes, stroke, and hypertension, all of which can lead to premature death. According to 2016 BRFSS data, nearly 70% of Orange County adults are either overweight or obese. Data from 2016-2018 show that 36.8% of school-aged children and adolescents are overweight or obese. Over the past ten years, the rates of obesity have continually grown, as well as the subsequent morbidity of cardiovascular disease, prediabetes, and hypertension.

STIs are on the rise in Orange County. There has been a 75% increase in the average number of newly diagnosed HIV cases in Orange County from 17.2 per year (2011-2015) to 26.3 per year (2016-2018). Chlamydia rates among both males and females from 2014-2016 are higher in Orange County than rates in the Mid-Hudson Region, and have steadily increased or remained the same from 2011-2013 to 2014-2016. Additionally, Orange County had its first fetal demise in 2019 from congenital syphilis in over 25 years.

Emerging issues are STIs, Opioid burden, Youth-related electronic vaping, and Prediabetes among adults. Other health areas where Orange County is worse than New York State or getting worse since the last assessment include:

- Overdose deaths due to opioid and heroin use
- Premature births among non-Hispanic Black women and Hispanic women
- Preventable adult hospitalizations
- Youth-reported alcohol and electronic vaping product use
- Unintended pregnancy among non-Hispanic Black women and Hispanic women
COMMUNITY SURVEY DATA POINTS OF NOTE

As part of the Community Health Assessment Process, the Orange County Department of Health (OCDOH) participated in the Mid-Hudson Region Community Health Survey, in partnership with the six other Mid-Hudson Region local health departments, HealtheConnections, and area hospitals, to collect data on 850 residents to help better characterize the needs of the community. Below are data points of note:

- 81% of Orange County respondents reported that accessible and convenient transportation was “very important” or “somewhat important” to them
- 80% of Orange County respondents reported that people may have a hard time finding a quality place to live due to the high cost of living
- 39% of Orange County respondents living in rural areas reported that places in Orange County did not feel safe vs. 54% of Orange County respondents living in urban zip codes
- 27% of Orange County respondents with <$25K yearly income reported experiencing a mental health condition or substance or alcohol use disorder compared to 14% of total Orange County respondents
- 28% of Orange County respondents with <$25K yearly income reported that in the past 12 months, they or any other member of their household has been unable to get food compared to 11% of total Orange County respondents
- 35% of Orange County respondents with <$25K yearly income reported that in the past 12 months, they or any other member of their household has been unable to get medicine compared to 14% of total Orange County respondents

ASSETS AND RESOURCES

OCDOH has strong community partnerships with hundreds of organizations serving its residents, including five area hospitals, federally qualified health care centers, private medical providers, local two-year and four-year colleges, a medical school, community-based organizations, and regional organizations serving a broad variety of community needs. OCDOH has established multiple coalitions, including Healthy Orange, the Maternal and Infant Community Health Collaborative, Orange County Health Disparities Initiative Planning Committee, and the Orange County Cancer Screening Collaborative, in addition to co-leading and participating on a large number of countywide coalitions, such as Changing the Orange County Addiction Treatment Ecosystem, WELCOME Orange, and the Resilience Project. These coalition partners will be mobilized to address the health areas of focus and emerging issues for the CHA/CHIP 2019-2021 cycle.
EFFORTS MOVING FORWARD

In addition to participating in the Mid-Hudson Region Community Health Survey, a service provider survey and subsequent focus group were conducted in March 2019, in partnership with the Joint Membership of Health and Community Agencies (JMHCA), to collect data on underrepresented populations, including low-income, veterans, persons experiencing homelessness, the aging population, LGBTQ community, and people with a mental health diagnosis or those with a substance use disorder. 41 responses were collected and three underlying issues that impact the health of the populations served by their agencies were identified as follows: 1) Access to affordable, decent and safe house; 2) Access to affordable, reliable public and personal transportation; and 3) Access to mental health providers.

OCDOH also created a Community Health Assessment Data Review Guide, as a review of 140 of the most current secondary data indicators available, stratified by the NYSDOH Prevention Agenda Areas for Orange County and New York State. Where available, trends from the previous year and comparison data from New York State were included. This document is available on the County website and was provided at the Orange County Health Summit on June 4, 2019. Over 100 partners, including hospitals, health care providers, community-based organizations, and academia, were in attendance to review the most current data; select the two Prevention Agenda Priorities for the 2019-2021 Community Health Improvement Plan (CHIP); and discuss both assets and barriers to addressing the two selected priority areas. Participants signed up to participate in ongoing strategic planning and implementation efforts for the 2019-2021 CHIP cycle. Each focus area chosen will have a corresponding workgroup co-led by OCDOH and area hospital staff. These workgroups will report out at the larger yearly Orange County Health Summit to share the ongoing efforts of the CHIP to other workgroups and the community.
